

# Gulf TREE

Join Us

November 29th, 12:30-3:30

Harte Research Institute, Rm 127  
Texas A&M University-Corpus Christi  
6300 Ocean Drive  
Corpus Christi, TX, 78412

## You're Invited!

Be the first to give your opinion on a new decision-support tree website that reduces uncertainty when selecting a climate tool.

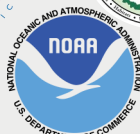

**HURRICANE HARVEY** has Texas communities thinking hard about rebuilding for long-term resiliency. We need tools to inform decision-making about heat, drought, floods, and storm surge.

Over 100 tools specialize in resilience on the Gulf Coast, and they're designed for many different groups—utilities, government, researchers, etc.

*How do you sort through all the tools to find the right one for your needs?*

Gulf TREE is a first-of-its-kind website, developed to help you find the right resilience tool.

On November 29th, we welcome analysts, researchers, local officials, and more to learn about and try out this new search engine. Register today!
