

THE UNIVERSITY OF TEXAS AT AUSTIN

Marine Science Institute

College of Natural Sciences

www.utmsi.utexas.edu

The University of Texas at Austin Marine Science Institute (UTMSI) is the oldest and most significant marine research facility on the Texas coast, is changing our understanding of the world's oceans and coasts, and educating a global population dependent on the ocean ecosystem. What began humbly in 1941 as a small, rough-lumber shack on the shores of the Gulf of Mexico in Port Aransas, is now home to world-class research, education, and outreach programs that benefit Texas, the nation, and the world.

Port Aransas Public Lecture Series 2016

UTMSI Marine Science Education Center Auditorium
855 East Cotter Avenue (near the beach), Port Aransas, Texas
